**REVERSE FLAME STEEL
BOILER COMPLETE
WITH MATCHED BURNER**

Internal view of combustion chamber

Special high-efficiency steel turbulator

Control panel:

STANDARD VERSION:

For models with 1/2 flame settings.

ELECTRONIC VERSION:

Variable temperature operation, controlling one mixed circuit (mixer valve + pump) management of cascading generators (max 16 power stages).

Available also in versions:

ECOMAX NC (boiler only)

ECOMAX NCS (dismantled boiler only)

Ecomax N natural gas features:

Rated supply pressure: 20 mbar;
gas ramps available with rated pressures 40, 100,
300 mbar. For other supply pressures only on
request.

Ecomax N boilers are designed to ensure the utmost: power efficiency, quietness, safety and durability. The Ecomax N range provides a new generation of heating boilers (with the possibility of variable temperature operation) that are particularly compact. The boiler is able to resolve any problem related to the new installation or when replacing existing appliances in old heating plants that are small in size and have awkward access. The reliability of the Ecomax N boiler stems from the perfect matching of the boiler shell and burner chosen at the design stage.

Heating packaged boiler:

Mechanical: burners and accessories already included;

Heating: choice of burner and pre-setting according to the power and boiler operation methods;

Electrical: boiler and burner prewired together.

Features:

- Gas or diesel heating operation;
- Complete with forced draught burner;
- Boiler and burner perfectly integrated for power and operation in total safety;
- Very thick steel shell;
- Pressurized furnace with flame reversal;
- Cylindrical flue pipes equipped with special turbulators;
- Complete with control panel (depending on type of operation);
- Prewired control panel and burner;
- High thermal insulation;
- Stylish casing;
- High seasonal efficiency (heating unit in conformity with Italian law 10 dated 9/1/91 and Italian Presidential Decree D.P.R. no.412 dated 26/8/93).

When there are special needs to lower the noise levels in the heating plant, an additional silencer is available on request, to be fitted to the burner intake.

Ecomax N Control Panel

STANDARD CONFIGURATION FOR ECOMAX N WITH 1 OR 2 FLAME SETTINGS

- Control thermostat;
- Second stage thermostat;
- Minimum thermostat;
- Safety thermostat;
- Thermometer;
- Burner switch;
- Circulator switch;
- Illuminated main switch.

FOR ECOMAX N 70 - 3500

ADDITIONAL FUNCTIONS FOR ELECTRONIC VERSION

- Heating timer programming;
- DHWS timer programming;
- Battery reserve: 2 years;
- Burner power management;
- Temperature curve setting compensated by external sensor;
- Heating unit circulator control;
- Control of a heating zone with a pump and possibly a mixer valve (an additional sensor is necessary);
- Tap water circulator control;
- Possibility of BMS control with 0-10V control;
- Possibility of MASTER or SLAVE configuration for cascade operation (up to a maximum of 16 power stages), with additional sensor;
- Possibility of a remote control connection;
- Complete with external sensor.

FOR ECOMAX N 70 - 3500

Ecomax NC, Ecomax NCS Control Panel

CONFIGURATION WITH 1 OR 2 FLAME SETTINGS

- Control thermostat;
- Second stage thermostat;
- Minimum thermostat;
- Safety thermostat;
- Thermometer;
- Burner switch;
- Circulator switch.

FOR ECOMAX NC 70 - 3500

Duomax N, Duomax PN Control Panel

STANDARD CONFIGURATION WITH 1 OR 2 FLAME SETTINGS

- 2 Control thermostats;
- 2 Second stage thermostats;
- 2 Minimum thermostats;
- 2 Safety thermostats;
- 2 Thermometers;
- 2 Burner switches;
- 2 Circulator switches;

FOR DUOMAX N 140-700
FOR DUOMAX PN 140-2600

ADDITIONAL FUNCTIONS FOR VERSION WITH ELECTRONIC CONTROL

- Equipped with programmable digital regulator to manage the power settings in sequence;
- Possibility of adjusting the temperature and the differential of the sequence;
- Automatic rotation of the burner power stages.

FOR DUOMAX N 140-700
FOR DUOMAX PN 140-2600

ADDITIONAL FUNCTIONS FOR ELECTRONIC VERSION WITH SLIDING TEMPERATURE

- Heating timer programming;
- DHWS timer programming;
- Battery reserve: 2 years;
- Management of 2 burners with two power stages (for a total of four power stages);
- Temperature curve setting compensated by external sensor;
- Heating element circulator control;
- Control of a heating zone with a pump and possibly a mixer valve (an additional sensor is necessary);
- DHWS circulator control;
- Possibility of BMS control with 0-10V control;
- Possibility of MASTER or SLAVE configuration for cascade operation (up to a maximum of 16 power stages) with additional sensor;
- Possibility of a remote control connection;
- Complemented with external sensor.

FOR DUOMAX N 140-700
FOR DUOMAX PN 140-2600

Duomax N

140 ÷ 700

**SPACE SAVING STACKED
REVERSE FLAME STEEL
BOILERS COMPLETE WITH
MATCHED BURNERS**

**Output managed automatically and efficiently for
significant reductions in fuel consumption**

Intelligent, powerful and ecological, Duomax N boilers (with independent, sectional furnaces) provide total control over every function and many advantages: less fuel consumption, reduced emissions of pollutants, extremely quiet operation. Technological research and the quality of the materials employed are the strength of the Duomax N units: made to assure truly unique comfort over time and dependable performance that has no rival.

Packaged boiler:

Mechanical: burners and accessories already in the outfit;

Heating: choice of burner and pre-setting according to the power and boiler operation methods;

Electrical: boiler and burner entirely wired together.

Features:

- Space saving stacked boilers;
- Complete with gas/diesel blown-air burners;
- Boiler and burner perfectly matched for power and operation in total safety;
- Very thick steel shell;
- Two pressurized furnaces with flame reversal that are large in size to have a low thermal load and obtain a reduction in the NOx produced by combustion;
- Power delivery on 1 or 2 flame settings for each furnace (for a total of 2 or 4 operating stages) controlled by independent thermostats, with the possibility therefore of managing each furnace autonomously (versions with 2 or 4 flame settings);
- Cylindrical flue pipes equipped with special turbulator;
- Complete with control panel (depending on type of operation);
- Prewired control panel and burners;
- High thermal insulation;
- Stylish casing;
- Reduced dimensions;
- High seasonal efficiency (heating unit in conformity with Italian law 10 dated 9/1/91 and Italian Presidential Decree D.P.R. no.412 dated 26/8/93).

Internal view of combustion chamber

Special high-efficiency steel turbulators

Control panel:

STANDARD VERSION:

For models with 2/4 flame settings.

ELECTRONIC VERSION:

Variable temperature operation, controlling one mixed circuit (mixer valve + pump) management of cascading generators (max 16 power stages).

On request, available also in version:

DUOMAX NS (dismantled boiler only)

Duomax N natural gas features:

Rated supply pressure: 20 mbar;
gas ramps available with rated pressures 40, 100, 300 mbar. For other supply pressures only on request.

When there are special needs to lower the noise levels in the heating plant, an additional silencer is available on request, to be fitted to the burner intake.

Duomax PN

140 ÷ 600

SPACE SAVING STACKED REVERSE FLAME STEEL BOILERS COMPLETE WITH MATCHED BURNERS

Output managed automatically and efficiently for significant reductions in fuel consumption

The ECOFLAM research laboratories have conceived the innovative **DUOMAX PN** boilers, designed according to the principle of splitting the power that can be delivered to the system.

Intelligent, powerful and ecological, Duomax PN units (with independent, sectional furnaces) provide total control over every function and many advantages: less fuel consumption, reduced emissions of pollutants, extremely quiet operation. Technological research and the quality of the materials employed are the strength of the Duomax PN units: made to assure truly unique comfort over time and dependable performance that has no rival.

Packaged boiler:

Mechanical: burners and accessories already in the outfit;

Heating: choice of burner and pre-setting according to the power and boiler operation methods;

Electrical: boiler and burner entirely wired together.

Features:

- Space saving stacked boiler;
- Complete with gas/diesel blown-air burners;
- Boiler and burner perfectly matched for power and operation in total safety;
- Very thick steel shell;
- Two pressurized furnace with flame reversal;
- Power delivery on 1 or 2 flame settings for each furnace (for a total of 2 or 4 operating stages) controlled by independent thermostats, with the possibility therefore of managing each furnace autonomously (versions with 2 or 4 flame settings);
- Cylindrical flue pipes equipped with special turbulator;
- Complete with control panel (depending on type of operation);
- Prewired control panel and burners;
- High thermal insulation;
- Stylish casing;
- Reduced dimensions;
- High seasonal efficiency (heating unit in conformity with Italian law 10 dated 9/1/91 and Italian Presidential Decree D.P.R. no.412 dated 26/8/93).

When there are special needs to lower the noise levels in the heating plant, an additional silencer is available on request, to be fitted to the burner intake.

The Duomax PN version is fitted as standard with a removable sound deadening casing.

Internal door lined with ceramic fibre for high insulation

Special closing: for better maintenance the door can be opened either to the right or to the left.

Control panel:

STANDARD VERSION:

REVERSE FLAME STEEL BOILER

Features:

- Very thick steel shell;
- Pressurized furnace with flame reversal;
- Cylindrical flue pipes equipped with special turbulator;
- Complete with control panel;
- High thermal insulation;
- Stylish casing;
- Can work with either liquid or gas fuel;
- High seasonal efficiency (heating unit in conformity with Italian law 10 dated 9/1/91 and Italian Presidential Decree D.P.R. no.412 dated 26/8/93).

Internal door lined with ceramic fibre for high insulation

Special closing: for better maintenance the door can be opened either to the right or to the left

ECOMAX NC CONTROL PANEL Configuration with 1 or 2 flame settings

- Control thermostat;
- Second stage thermostat;
- Minimum thermostat;
- Safety thermostat;
- Thermometer;
- Burner switch;
- Circulator switch.

The Ecomax NC 1400-3500 models feature a preassembled, stylish, rounded casing made of embossed aluminium.

Ecomax NCS

Dismantled

REVERSE FLAME STEEL BOILER

The Ecomax NCS heat generator is supplied dismantled in order to be assembled in the heating plant during installation if it was not possible to insert the boiler already assembled.

The technical and mechanical specifications of the ECOMAX NC series are unchanged.

Features:

- Very thick steel shell;
- Pressurized furnace with flame reversal;
- Cylindrical flue pipes equipped with special turbulator;
- Complemented with control panel;
- High thermal insulation;
- Stylish casing;
- Can work with either liquid or gas fuel;
- High seasonal efficiency (heating unit in conformity with Italian law 10 dated 9/1/91 and Italian Presidential Decree D.P.R. no.412 dated 26/8/93).
